

FIVE TIPS FOR BUYERS FROM LEADING NURSERY SUPPLIER

If you buy everyday essentials for your nursery or pre-school group, how much attention do you pay to the detail of the products on your order? There's often simple ways of cutting costs so the next time you are preparing your order:

1. Does your supplier have an 'own brand'? Check it for quality. Whilst some own brands are cheap and low quality, others are genuine bargains and its certainly worth the investigation.
2. Take advantage of seasonal buys – buy in bulk at the right time. Ask your supplier for advice.
3. Analyse the area of greatest expenditure – how could you save? Look at the detail – a good supplier will help you with a cost analysis
4. Find out what you are actually getting – how much of a good deal is 'the bargain' you've been offered? Take into account weight/volume/amount of usage you'll get.
5. Check how the products you have ordered are being used – for example, is the correct amount of cleaning fluid used per wash? How many wipes are being used for simple mop ups?

Gompels Healthcare Ltd has been supplying everyday consumables to a number of market sectors for the last 20 years. The company leads the way in ordering and warehouse technology and offers a wealth of purchasing/supplier experience from a global market. Gompels' bi-monthly catalogue gives details of hundreds of products lines available, drawing attention to special bulk buys.

Gompels Healthcare Ltd is launching their September/October catalogue at Childcare Expo in the Ricoh Arena, Coventry, 16 – 17th September 2011.
